SIMON GJETAJ

Full Stack Developer

📞 +355 68 557 0902   @ gjetajsimon@gmail.com   🔗 https://simongjetaj.github.io/

SUMMARY

A quiet achiever; highly motivated, calm and focused computer science graduate with an experienced knowledge of web design & development.
Currently, a developer with a passion for beating "best-yets" and unpacking complicated problems.
Besides computer science, with a background in data science, digital marketing, architecture principles and engineering.

EXPERIENCE

Developer

Pragmatic Software

📅 05/2018 - Ongoing   📍 Tirane, Albania

In my current position as a Developer some of my responsibilities include:

• Working as part of a team, which may be established purely for a particular project to write a specific section of the program.
• Participating in the entire application lifecycle, from layout to function by integrating user-facing elements with server side logic.
• Compiling and analyzing data, processes, and codes to troubleshoot problems and identify areas for improvement.
• Participating in continuing education and training to remain current on best practices, learn new programming languages, and better assist other team members.

Computer Science Intern

Pragmatic Software

📅 03/2018 - 04/2018   📍 Tirane, Albania
🔗 https://github.com/simongjetaj/Sports-Store

The first few days of my experience at Pragmatic Software were a bit hectic as I moved from Javascript and Node.js to C# and ASP.NET MVC. But, I learned more than I ever expected by solving some interesting C# programming challenges and building two customized ASP.NET MVC projects based on Adam Freeman's book.
It helped reinforce my knowledge of responsibility, focus, drive and ambition.

EDUCATION

Computer Science

Faculty of Natural Sciences, University of Tirana

📅 10/2015 - 07/2018   📍 Tirane, Albania

TECHNOLOGIES

Front-end

| UI/UX Design | HTML5 |
| CSS3 (CSS Grid Layout & Flexbox) |
JavaScript (ES6)	jQuery	Ajax
React	Angular	Bootstrap
Materialize	Bulma	Sass

Back-end

Node.js	Express	C#
ASP.NET MVC	ASP.NET Web API
PHP (CodeIgniter)	SQL Server
MySQL	MongoDB (mongoose)

PROJECTS

Humans of New York II

📅 02/2018

🔗 https://github.com/simongjetaj/HumansOfNewYorkII

A yelp-like application from scratch using Bulma, Node, Express, MySQL, jQuery and Ajax.

Sports Store

📅 04/2018

🔗 https://github.com/simongjetaj/Sports-Store

Customized ASP.NET MVC project based on Adam Freeman's book.

Ndreca Simon

📅 11/2017

🔗 http://ndrecasimon.netlify.com/

A minimal website designed and developed for a construction company.

Local Weather

📅 10/2017

🔗 https://codepen.io/simongjetaj/full/KXvrVM/

A local weather application utilizing Vanilla JavaScript, a weather API and the Google Places API to search for the weather on different cities, places or countries. There are also features on click temperature conversion and background images that vary depending on the type of weather.

Free Code Camp's Projects

📅 10/2017 - 11/2017

🔗 https://github.com/simongjetaj/freecodecamp-projects

I built all the front-end curriculum projects in less than a month.
