PROJECTS

Local Weather
📅 10/2017 - 11/2017
🔗 https://codepen.io/simongjetaj/full/KXvrVM/

A local weather application utilizing Vanilla JavaScript, a weather API and the Google Places API to search for the weather on different cities, places or countries. There are also features on-click temperature conversion and background images that vary depending on the type of weather.

Humans of New York II
📅 02/2018 - 02/2018
🔗 https://github.com/simongjetaj/HumansOfNewYork II

A yelp-like application from scratch using Bulma, Node, Express, MySQL, jQuery and Ajax.

Construction Website
📅 11/2017 - 12/2017
🔗 https://ndrecasimon.netlify.com/

A minimal website designed and developed for a Construction Company.

Simon System
📅 12/2017 - 01/2018
🔗 https://github.com/simongjetaj/system

A CodeIgniter PHP app (login/registration system that keeps track of which users are admin and which are normal users, users can update their profile while admin(s) can add users, delete or edit them. There is also a public chat).

Pomodoro Clock
📅 10/2017 - 11/2017
🔗 https://codepen.io/simongjetaj/full/jaOwwP/

An application with plain Javascript to implement the Pomodoro technique.
